Effective yield is equal to average interest rate over the initial seven-year term.

A base interest rate is set for the purchase payment. In years two through seven of the purchase payment's seven-year term, 0.25% will be added to the credited rate of the previous year.

The base interest rate will never be below 1.50%. The increasing interest rate will never be below 0.01%.

Early withdrawal charges and market value adjustments apply if you surrender your annuity or take withdrawals from it during the initial seven-year term. If subsequent seven-year terms are selected, early withdrawals charges and market value adjustments will apply during such terms. Early withdrawal charges and market value adjustments do not apply to amounts covered by the 10% free withdrawal allowance.

The contract provides life annuity settlement options. If you select one of these options, we will make periodic payments until the death of the person on whose life payments are based. After the annuity commencement date, you cannot surrender your annuity or withdraw any other money from your annuity.

In general you will pay ordinary income taxes on the earned interest when you receive annuity benefit payments, you surrender your annuity or you take a withdrawal. You may pay a 10% federal penalty tax on the taxable amount of any payment that you receive before age 59½.
