

Upside Potential And Downside Protection With A Competitive Cap

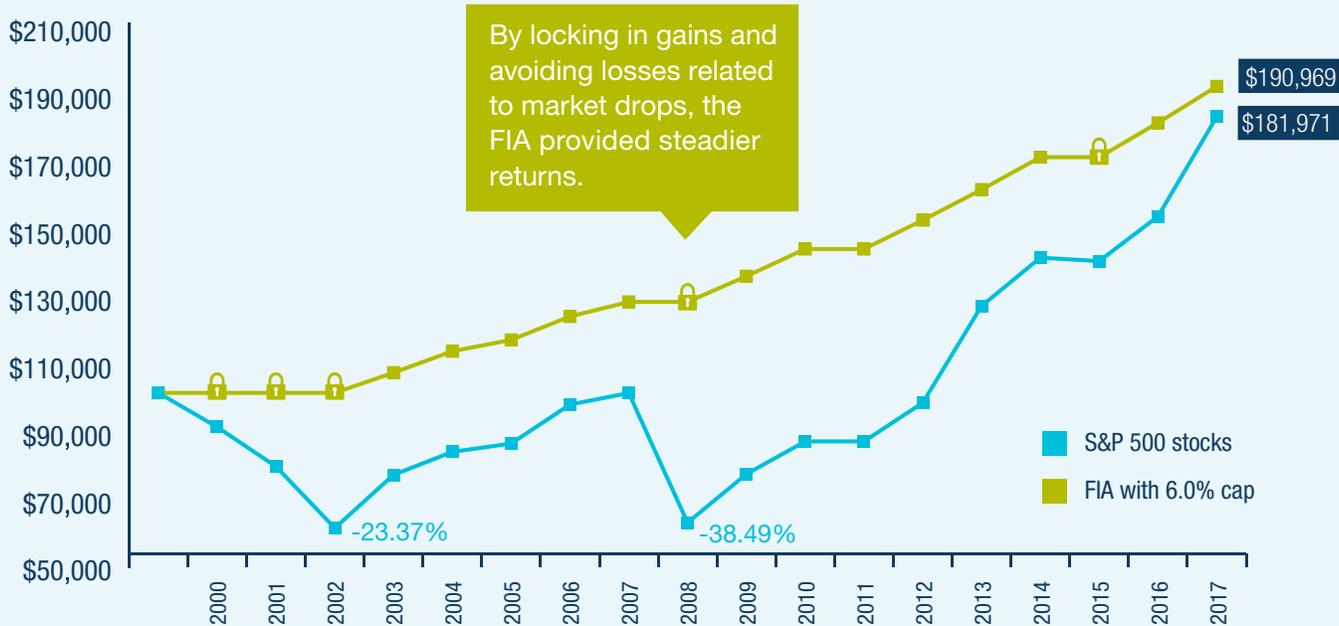

Uncomplicate Retirement®

Win By Not Losing

As you near retirement, the possibility of a market downturn may become a greater concern. However, there is a way to achieve upside potential and downside protection. A fixed-indexed annuity (FIA) allows you to participate in positive market performance (up to a cap) and locks in gains—this means your account value is protected and will remain level, even when the market declines.

Comparing index performance to an FIA

Consider a \$100,000 IRA invested in stocks that make up the S&P 500® Index, and a \$100,000 FIA with all purchase payments allocated to an indexed strategy with a 6% cap. Going back to 2000, see how the FIA would have locked in gains during times of market declines.

This graph is designed to help you understand how a fixed-indexed annuity works. It is not intended to show past or future performance of an indexed strategy. Graph illustrates historical performance of S&P 500 since 2000, excluding dividends paid on the stocks included in the index. Hypothetical fixed-indexed annuity assumes a \$100,000 purchase payment, allocated to an S&P 500 annual point-to-point index strategy with a 6% cap for each calendar year in the 17-year period shown in the graph. However, during the period shown in the example, the actual caps that we applied to our fixed-indexed annuities varied by product and from term to term and ranged from 2.00% to 10%. In addition, the one-year terms for our fixed-indexed annuities are not based on a calendar year but start on the 6th and 20th of each month. A different cap and a different term start date would affect the performance of the hypothetical FIA and result in higher or lower account values than those shown above. For example, if we assumed a 2.00% cap, then the account value at the end of 2017 would have been \$122,444.94.

This example assumes no money is withdrawn from the FIA. If you take a withdrawal or surrender an FIA during the early withdrawal charge period, an early withdrawal charge and a market value adjustment may apply. An early withdrawal charge will reduce the account value. A market value adjustment may increase or reduce the account value.

S&P 500 and FIA returns and account values since 2000

IRA invested in S&P 500 stocks			FIA allocated to S&P 500 indexed strategy with 6% cap	
Year	Return	Account value	Return	Account value
2000	-10.14%	\$89,860.82	0.00%	\$100,000.00
2001	-13.04%	\$78,140.54	0.00%	\$100,000.00
2002	-23.37%	\$59,882.25	0.00%	\$100,000.00
2003	26.38%	\$75,679.43	6.00%	\$106,000.00
2004	8.99%	\$82,485.62	6.00%	\$112,360.00
2005	3.00%	\$84,961.04	3.00%	\$115,731.95
2006	13.62%	\$96,532.25	6.00%	\$122,675.87
2007	3.53%	\$99,939.42	3.53%	\$127,005.80
2008	-38.49%	\$61,476.94	0.00%	\$127,005.80
2009	23.45%	\$75,895.86	6.00%	\$134,626.15
2010	12.78%	\$85,597.41	6.00%	\$142,703.72
2011	0.00%	\$85,594.69	0.00%	\$142,703.72
2012	13.41%	\$97,069.25	6.00%	\$151,265.94
2013	29.60%	\$125,802.96	6.00%	\$160,341.90
2014	11.39%	\$140,132.71	6.00%	\$169,962.41
2015	-0.73%	\$139,114.51	0.00%	\$169,962.41
2016	9.54%	\$152,379.11	6.00%	\$180,160.16
2017	19.42%	\$181,971.08	6.00%	\$190,969.76
Annualized return	3.38%		3.66%	

The annualized rate of return is the rate of return that the indexed strategy would have to earn each year in order to achieve the results shown.
